"WE LOVE YOUR HOME."

Was sind DPC-Panels?

DPK-Platten bestehen aus **Holz-Kunststoff-Verbundwerkstoff**, einer Mischung aus **Holzfasern und Thermoplast**. Sie sind äußerst beständig gegen **Feuchtigkeit, Korrosion und ultraviolette Strahlen** und haben daher eine **lange Lebensdauer**.

DPC-Platten können in der **Innenverkleidung** verwendet werden, um ein **einzigartiges und modernes Innendesign** zu schaffen. Darüber hinaus können sie mit **verschiedenen dekorativen Drucken** individuell gestaltet werden, die **Holz, Stein oder andere natürliche Materialien** imitieren können.

Präsentation

Material:

Holzfasern und Thermoplast

Dichte:

700 kg/m³

Maße

1220 mm * 2440 mm

1220 mm * 2800 mm

1220 mm * pro Stange mm

Eigenschaften:

wasserdicht

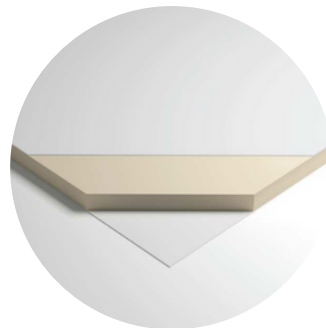

flexibel

Dicke:

5mm und 8mm

Feuer Beständigkeit:

B1
